culla

therapy and relax chair

Elmi-Reha is a company founded in 1997, which belongs to Elmi Ltd based in Kaltern/Caldaro, South Tyrol - Italy. Elmi-Reha's first years were spent working as a distributor for german and scandinavian brands, looking to sell in Italy. A couple of years later, we decided to start in South Tyrol our own production of stability and walkingaids: Movita. This verticalizing and mobility device is used for rehabilitation in case of neurologic and orthopaedic disorders, as well as of cardiovascular mobilisation, or of general equilibrium and balance problems. Later on we launched the production of our therapy and relaxing chair: Culla. Thanks to the comfortable trough shape (supportive fetal positioning), the patient rests in a secure and warm feeling, where relaxing and well-being sensations are enhanced. Elmi-Reha sells and delivers its products far beyond the italian borders, but our production remains in South Tyrol. We live and work in exciting times. New possibilities come up on a daily basis. New materials and developments allow us to think up innovative solutions. And our specialized competences help us operate succefully in the field. Because the world population is aging and the quality of life expectations are increasing, it becomes essential to offer designed products made for this specific target group. The care for elderly people with special needs can only be guaranteed with the right successful, functional and appropriate supply of aiding equipment's.

culla

therapy and relax chair

-multipurpose therapeutic chair/day bed-

culla is a therapeutic and relaxing chair that transmits safety, warmth, relaxation and well-being to the patient. The sitting / lying position can be set using the adjustable handle pressure.

culla provides optimal comfort, whether sitting or lying thanks to its perfect shape and the high-quality padding. The comfortable front-side entrance facilitates the transfer. The pleasant concave shape adapts to the body offering support, security, warmth, and replicates the embryonic position.

culla, developed for patients with physical and mental disabilities, offers relief to patients with muscle problems and weakness, reassures who is affected by Alzheimer's and Parkinson's disease, aids in the prevention of bedsores, facilitates the sitting for who is suffering from arthritis, gives well-being for people with walking difficulties, strengthens the feeling of well-being and relaxation of individuals with anxiety and depression, encourages embryonic position through its cradle shape intensifying the feeling of warmth and inner peace, sustains patients with stroke, helps the ones that are suffering from Huntington's Chorea and who are in a vigil coma.

culla improves the quality of life and safety of patients who spend most of their time sitting or lying down and not wanting to lose their mobility at home, in nursing homes, in hospitals, or in therapy centers and clinics.

culla care indoor

for internal use

culla care is a therapeutic and relaxing chair that transmits safety, warmth, relaxation and well-being to the patient. The sitting / lying position can be set using the adjustable handle pressure.

culla care provides optimal comfort, whether sitting or lying thanks to its perfect shape and the high-quality padding. The comfortable front-side entrance facilitates the transfer. The pleasant concave shape adapts to the body offering support, security, warmth, and replicates the embryonic position.

available in 4 colours: blue, green, red, yellow

TECHNICAL DATA	
total width	65 cm
length without footrest	83 cm
length with footrest	117 cm
seat width	40 cm
seat depth	48 cm
seat height	34 – 66 cm
internal back height	76 cm
weight limit	150 kg
wheels	4 full rubber 360° rotating wheels with brakes, 125/30 mm
frame	robust powder coated steel frame (FE36)
regulation system	gas inclination
coating	respirable PVC eco-leather – cotton flame retardant 1IM UNI 4848 CSE RF 4/83 UNI 9175
padding	Espanso Catas UNI 9175//87 UNI 9175 FA-1/94 1.IM

culla care outdoor

for internal and external use

culla care is a therapeutic and relaxing chair that transmits safety, warmth, relaxation and well-being to the patient. The sitting / lying position can be set using the adjustable handle pressure.

culla care provides optimal comfort, whether sitting or lying thanks to its perfect shape and the high-quality padding. The comfortable front-side entrance facilitates the transfer. The pleasant concave shape adapts to the body offering support, security, warmth, and replicates the embryonic position.

culla care is extremely agile and safe for outdoor use thanks to the large 400/40 wheels in full rubber and thanks to the dynamic and positioning break.

available in 4 colours: blue, green, red, yellow

culla balance indoor

for internal use

culla balance provides optimal comfort, whether sitting or lying thanks to its perfect shape and the high-quality padding in Memory Foam which is a viscoelastic material, which deforms with the body heat and therefore maintains heat and it adapts itself to the patient's spinal cord shape.

culla balance has a removable height-adjustable headrest that allows a subjective setting of the device and functions as a backrest extension. The shoulder section is larger to give more freedom. The footrest has an ergonomic design which supports the calves. The comfortable front-side entrance facilitates the transfer. The pleasant concave shape adapts to the body offering support, security, warmth, and replicates the embryonic position.
