**Description:**

PERET GmbH/Srl was founded in 2009 by Dipl.Ing. Lukas Pescoller and Konrad Silbernagl. As a small, flexible high-tech company, we are constantly looking for new areas of application in order to incorporate our more than 20 years experience and know-how into new solutions for the industry. We offer innovative measurement technology for packaging printing, for the manufacturing process of packaging and for security printing. In-house development and production give us the opportunity to react flexibly and quickly to special customer requirements and thus expand the areas of application of our products. We have made a name for ourselves worldwide, especially in the areas of flexographic printing plates and sleeves, control of creasing and embossing processes in folding box production, corrugated board production and, last but not least, in the area of security printing and brand protection.
